Hillary Esposito

HEALTHCARE PRODUCT & SERVICE DESIGNER · CLINICAL WORKFLOWS & CARE SERVICES

New York City · espositohillary@gmail.com · hillaryesposito.org · linkedin.com/in/hillaryesposito

PROFESSIONAL SUMMARY

Healthcare product and service designer with six years at a cancer center (MSK) and 13+ years of Army service, including medical logistics. I map what staff do, where work changes hands, and who owns the next step. I stay through prototyping and implementation. At MSK, a workflow redesign I initiated contributed to a 20% organization-wide electronic medical record (EMR) cost reduction, as part of a larger initiative. MHA, Lean Six Sigma Green Belt, Army veteran, and bilingual English/Spanish communicator.

CORE SKILLS

Healthcare product/service: clinical workflows, current/future-state mapping, journey mapping, service blueprinting, internal tools, change management, implementation, accessibility

Product and research: information architecture, task analysis, stakeholder interviews, workflow observation, survey synthesis, usability testing, functional prototypes, design systems

Tools and domain: Figma, FigJam, Miro, React, HTML/CSS, Epic/EMR workflows, healthcare operations, medical logistics, Lean Six Sigma

HEALTHCARE PRODUCT AND SERVICE EXPERIENCE

Training Facilitator (retitled Trainer I Specialist) · Memorial Sloan Kettering Cancer Center

New York, NY · January 2022–July 2024

- Rebuilt the learning tracks for administrative onboarding across Epic, HIPAA, compliance, and role-specific workflows for a 21,000+ person organization.
- Partnered with clinical, IT, HIM (health information management), and operations stakeholders to clarify ownership, exceptions, and handoffs across complex internal processes.

Office Coordinator → Administrative Assistant · Memorial Sloan Kettering Cancer Center

New York, NY · 2018–2022

- Found patient-portal messages being printed so they could be scanned into the chart. Checked a fix with clinical, IT, HIM, and operations, then pitched a button that files them straight to the chart (pitch projected ~$1M/year).
- IT and UX built the button after I changed roles. It contributed to an organization-wide initiative that cut EMR costs 20%.
- Rewrote CPR certification language with physicians and legal. The department certified a month before the original deadline, no extension.

Commissioned Officer · NJ Army National Guard

2013–2026 · Platoon Leader, Company Commander, Brigade Medical Supply Officer

- Cut medical resupply from 1–2 months to 1–2 weeks (85% faster per service record) by moving the warehouse into a combat zone.
- Built real-time order-status tracking for seven aid stations in three countries. Sites stopped over-ordering and running out, cutting spending 60%; deployment coordination improved 15%.
- Directed medical logistics for 5,000+ soldiers and $2M in supplies in Iraq while absorbing a vacant Medical Operations Officer role and reporting medical operations to the Pentagon.

CURRENT PRODUCT DESIGN

Founder, Product Designer, Developer · Grove Plant Care

Independent product · 2025–Present · Functional prototype, Phase 2 of 3

- Narrowed 12 proposed features to 3 after synthesizing a 35-person self-report survey, then translated the priorities into information architecture, interaction states, and a functional React prototype.
- Own research planning, product scope, responsive interaction design, accessibility, prototype implementation, and iteration. The prototype is not presented as a shipped consumer product.

Product Designer, Solo Entry · Yummy Labs AI Design Sprint, in partnership with Knowunity

September 2026 · AI Design Sprinter badge · Working prototype

- Designed a voice active-recall step for students and built it as a working prototype on Knowunity's component kit with AI coding tools. Recall is mocked and untested with students; not a shipped Knowunity feature.

Content Designer, Contract · Mobbin

Remote · March–June 2026

- Documented 200+ mobile screens per app across Kikoff, Polymarket, and Discover, mapping navigation, interaction patterns, visual hierarchy, and microcopy for a reusable UX reference library.
- Applied a consistent taxonomy so product and design teams could compare complete finance-app flows. The assignment covered documentation, not ownership of the products.

EDUCATION AND CREDENTIALS

Education: Master of Healthcare Administration, with honors, Rutgers University; Bachelor of Science, Public Health, Rutgers University; Associate of Science, Valley Forge Military College

Credentials: Google UX Design Certificate; Lean Six Sigma Green Belt, Purdue; UX, Data Analytics, and Software Engineering Bootcamps, Noble Desktop
