Hillary Esposito

UX DESIGNER, PRODUCT DESIGNER & RESEARCHER · HEALTHCARE AND CONSUMER PRODUCTS

New York City · espositohillary@gmail.com · www.hillaryesposito.com · linkedin.com/in/hillaryesposito

PROFESSIONAL SUMMARY

UX designer, product designer and researcher with six years at a cancer center (MSK) and 13+ years of Army service. I turn frontline observation, workflow analysis, stakeholder input, and technical constraints into clearer internal tools and testable product flows. At MSK, a workflow redesign I initiated contributed to a 20% organization-wide electronic medical record (EMR) cost reduction, as part of a larger initiative. MHA, Lean Six Sigma Green Belt, U.S. Army veteran, and bilingual English/Spanish communicator.

PRODUCT DESIGN EXPERIENCE

Founder, Product Designer, Developer · Grove Plant Care

Independent product · 2025–Present · Functional prototype, Phase 2 of 3

- Narrowed 12 proposed features to 3 after synthesizing a 37-person self-report survey, then translated the priorities into information architecture, interaction states, and a functional React prototype.

HEALTHCARE SYSTEMS AND WORKFLOW EXPERIENCE

Training Facilitator (retitled Trainer I Specialist) · Memorial Sloan Kettering Cancer Center

New York, NY · January 2022–July 2024

- Rebuilt the learning tracks for administrative onboarding across Epic, HIPAA, compliance, and role-specific workflows for a 21,000+ person organization.

Office Coordinator → Administrative Assistant · Memorial Sloan Kettering Cancer Center

New York, NY · 2018–2022

- Found patient-portal messages being printed so they could be scanned into the chart. Checked a fix with clinical, IT, HIM, and operations, then pitched a button that files them straight to the chart (pitch projected ~$1M/year).
- IT and UX built the button after I changed roles. It contributed to a broader organization-wide initiative that reduced EMR costs by 20%.
- Rewrote CPR certification language with physicians and legal. The department certified a month before the original deadline, no extension.

Commissioned Officer · NJ Army National Guard

2013–2026 · Platoon Leader, Company Commander, Brigade Medical Supply Officer

- Cut medical resupply from 1–2 months to 1–2 weeks (85% faster per service record) by moving the warehouse into a combat zone.
- Built real-time order-status tracking for seven aid stations in three countries. Sites stopped over-ordering and running out, cutting spending 60%; deployment coordination improved 15%.

EDUCATION AND CREDENTIALS

Education: Master of Healthcare Administration, with honors, Rutgers University; Bachelor of Science, Public Health, Rutgers University; Associate of Science, Valley Forge Military College

Credentials: Google UX Design Certificate; Lean Six Sigma Green Belt, Purdue; UX, Data Analytics, and Software Engineering Bootcamps, Noble Desktop
